

## **SECURE MANAGEMENT IN THE CLOUD**

### **BUILDING PERFORMANCE MANAGEMENT**

With Priva Remote Commissioning you can engineer, commission and maintain your building management system remotely. Any problems in the system? You can easily rectify the problem remotely.

➤ **For now and in the future**

The system can easily be expanded with other functions and rolled out to multiple buildings

## > **Multi-user operating system**

Multiple users can log in and work with it at the same time

## > **Optimum security**

Advanced security functions prevent unauthorised traffic entering from outside

## **Simple, secure and protected**

The connection between the system and the remote building manager can be set up easily via Microsoft Azure. Advanced security functions keep unauthorised traffic out and protect your data. In addition, it is not possible to access the company network via this connection.

## **Save time and money**

Dial-up connections are now a thing of the past. The connection of Remote Commissioning of the building management system takes place over the internet and is therefore much faster.

The annual costs of this solution are fixed when purchased with a Digital Service Starter package. It's included in the package price when you purchase the Priva Essentials and Priva Plus package.

As a Technical Specialist you will be able to support your customers remotely and resolve any problems.

## **Ready for the future**

Are you likely to need historical data storage or alarm management in the future? These and other functions, such as system and energy performance, can be managed over the same connection.

**Effectively and efficiently manage your indoor climate?**

Download this free brochure and learn how a Priva management system can help you!

### **Scalable**

Easy to expand with other functions, such as alarm management or energy performance

### **Fast connection**

Fast connection with the building management system via the Microsoft Azure cloud service
