

PRIVA CONNECTED

> THE FIRST STEP TO OUR ONLINE APPLICATIONS AND SERVICES

Priva Connected service package

Priva Connected is a service package that gives you access to Priva Operator, Priva Alarms, and Access Control. These essential online services enable you to operate your growing facility remotely. All you need to get your greenhouse connected to the Priva platform is the Priva Gateway. Once connected, you can also add new and additional services such as Plantonomy, our technology for autonomous growing.

> Operate your growing facility remotely

Manage and monitor your climate, water, lighting and energy. Anytime, anywhere, on any device.

> Access to new online services

Be the first to use newly developed online applications and services and take your business to the next level.

> Ensure business continuity

Always have the most up-to-date versions of Priva software installed to ensure the performance and security of your systems.

The package unlocks three applications right away

With Priva Connected you will have a single point of access to the MyPriva portal. A secure cloud environment based on Microsoft Azure technology in which you can access and manage your applications. The package includes three online applications: Operator, Alarms and Access Control. These applications enable you to manage your crop anytime and anywhere.

Priva Operator

Manage your climate and operate your site remotely

With Priva Operator, you can monitor and manage your crop remotely. The online application makes operating your Priva process computer easy and convenient. You can manage your climate, water and energy, by simply using your smartphone, tablet or laptop. View the settings and measurements for your growing facility in real time and adjust your strategy and settings as you please. [Would you like to know more about Operator? Read more.](#)

Priva Alarms

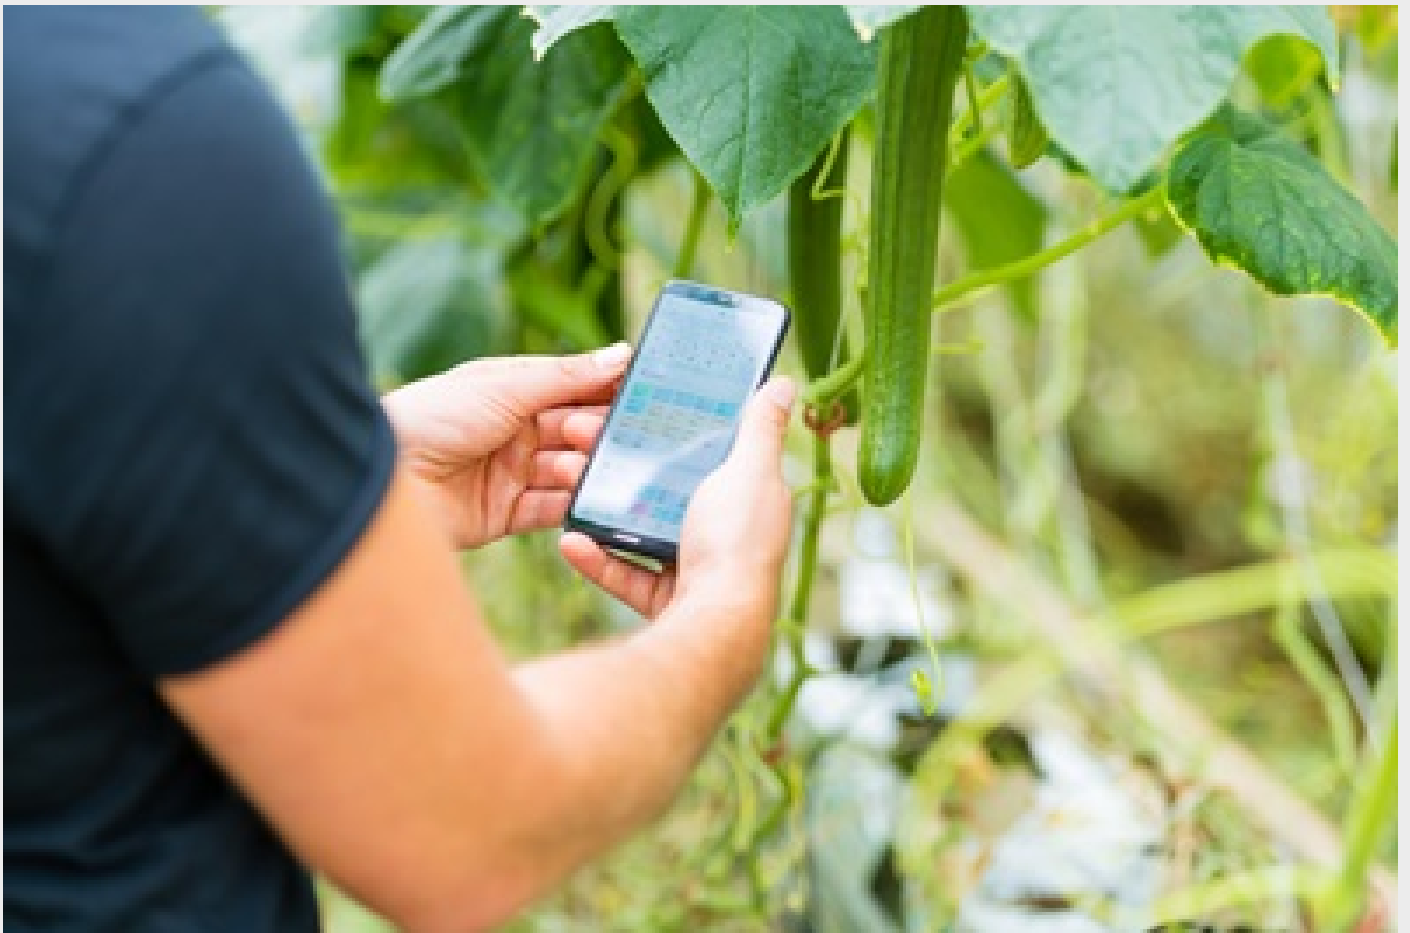

Stay informed of all your active and historical alarms in your Priva Control Systems

Priva Alarms provides you with an overview of all alarms linked to the Priva systems at your horticultural business. It alerts you when an alarm is activated and gives you detailed information while you are on the go.

Access Control

Manage users and access to Priva products and services for your organization

Access Control allows you to manage the users in your cloud environment. You can give access and manage the user rights for your co-workers, partners or consultants directly within the app, for easy optimization of your workflow.

WOULD YOU LIKE MORE INFORMATION ABOUT PRIVA CONNECTED FOR YOUR COMPANY?

The service package that lets you operate your growing facility remotely.

The package would not be complete without our full support

When you start using Priva Connected, in addition to the online applications, you will also receive free online support via the Priva Help Center and support from our help desk specialists. The package also includes online personalized advice from our Priva consultants.

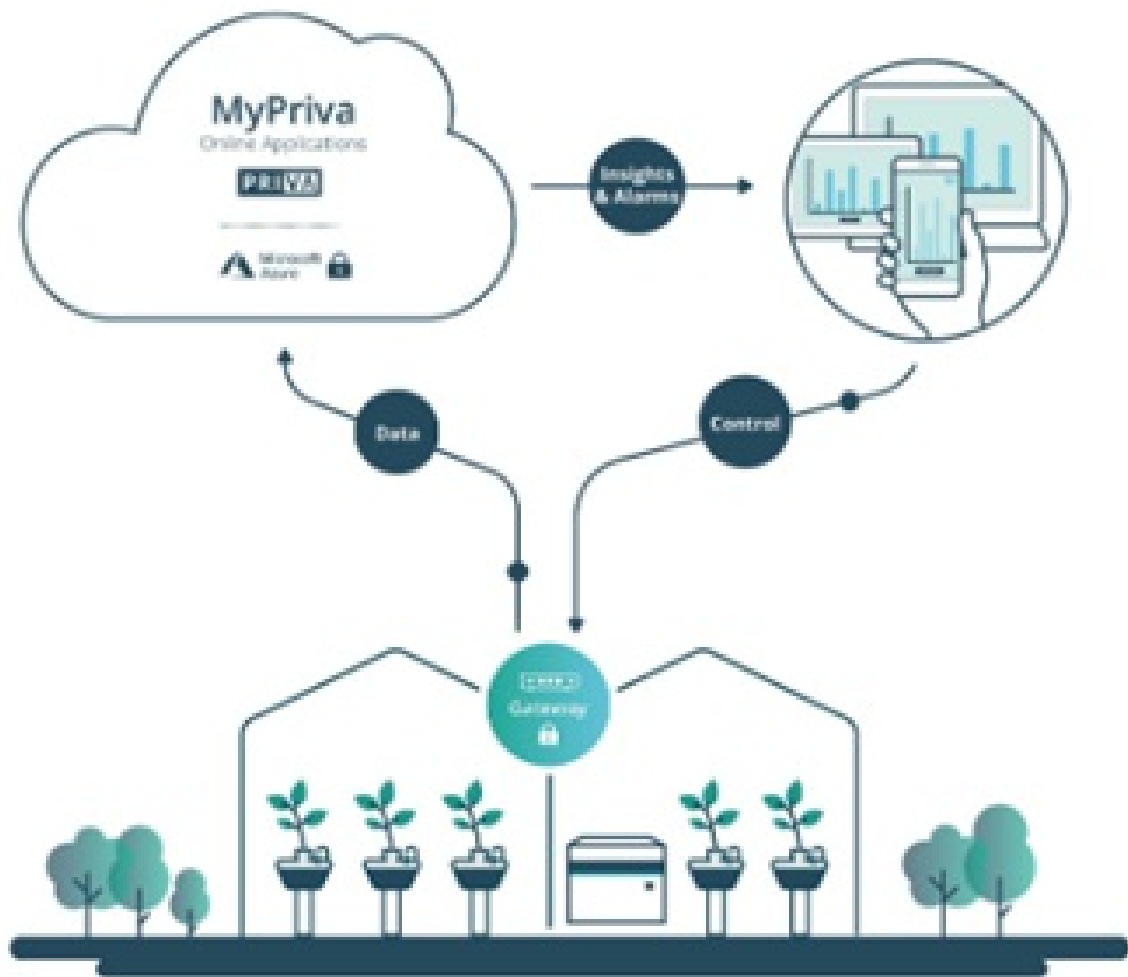

You will also receive free access to online training courses through our Priva Academy. This online platform gives growers access to courses on various topics that they deal with on a daily basis. [Would you like to know more about Priva Academy? Read more here.](#)

Ensure business continuity with up-to-date Priva software

With the Priva Connected package, you will receive continuous software updates to ensure you always have a future-proof solution with the latest software. Online applications are updated automatically, and you'll receive notifications about new features.

Connex and Compact CC process computers will require new software to be installed by your Priva partner. For the performance and security of your systems, it is important that your software is up to date.

Additional online applications & services

Our platform seamlessly connects all aspects of the growing process, enabling you to manage your crop in the most efficient and reliable way possible. Once you're connected to the Priva Open Platform you can further optimize the growing process and your business strategy with additional services. For example, with our autonomous growing technology, Plantonomy. You will be the first to try out new products and services by connecting to the Priva cloud.

ONLINE APPLICATIONS

Use newly developed digital services and take your business to the next level.

CONSULTANCY & SUPPORT

Whenever you need some help, we are here to support you.

SOFTWARE UPDATES

Ensure your Priva software is always up to date to guarantee the security and performance of your systems.
