

## PRIVA COMPACT

The Priva Compact process computer incorporates the perfect basic controls for climate and water dosage in combination with a simple operation. It provides you with a reliable and user-friendly base in climate control and is suitable for controlling various greenhouse complexes. The Priva Compact is the “smaller brother” of the Priva Connex process computer.

- > **Basic controls for climate and water dosage**
- > **Up to 15% energy savings**
- > **Simple operation**
- > **Fits your automation needs perfectly**
- > **Easy upgrade to Priva Connex**

### **Controls tailored to your business operations**

The Priva Compact includes the right controls for the applications that are most frequently used in your company. This includes various controls for ventilation, heating, curtains, CO<sub>2</sub>, fans, humidification, lighting, boiler, water dosage, fertilizer dosage, and the option to reuse drain water. Naturally, all of these controls are completely in tune with each other. The result is a computer that fits perfectly with your automation needs.

### **Clear and simple operation**

The operating program, Priva Office Direct, allows you to operate the Priva Compact very easily. You can choose monochrome and/or color controls. The color controls have a clear and graphic appearance, which increases the ease of use and the way that everything works is immediately clear too. You can fully customize the controls to suit your own preferences and operating situation.

### **Energy savings**

The Priva Compact can offer you energy savings of up to 15%. The Priva Compact calculates the required amount of energy needed to fulfill your climate strategy in advance. This will prevent later adjustments as much as possible, resulting in energy savings.

### **Upgrading to the Priva Connex**

The Priva Compact includes the right controls for the applications that are most frequently used in your company. As your company grows with buffers, CHPs and silo management, for example, the need for more advanced horticulture technology grows too. In the past it was customary to replace the entire process computer and suffer the serious financial consequences that this entailed. The Priva Compact allows you to easily upgrade to the Priva Connex, which is the most advanced process computer available at this time. The complete installation is retained, resulting in significant savings in labor costs. Examples of this are the absence of installation costs and commissioning costs. The Priva Compact is the leg-up towards your next ambition.

### **Proven horticulture technology**

The Priva Compact is a reliable process computer with proven horticulture technology. You can rely on the knowledge and expertise that Priva has gained from 50 years of experience in the horticulture industry.
