

> a complete overview of your data at a glance

Priva Customizable Dashboard

With Priva's Customizable Dashboard you easily design a tailored overview of your building data. Choose your own images, tables and data. Say goodbye to long searches through different systems. This feature allows you to create a complete overview of the necessary data – at a glance.

> **Clear overview**

Present your data in one, clear overview

> **Flexibility**

Freedom to edit yourself, whenever and as often as you want

> **User-friendly**

Easy to edit, no changes to the technical control system necessary

Overview

Priva's Customizable Dashboard offers a complete overview of your building data in one single page. No need to navigate through multiple pages to reach the data you want – saving you valuable time. Decide how to visualize your data and easily edit it yourself.

The feature automatically scales to any device the dashboard is viewed on. That way, whether you would like to keep track of a set of measurements during commissioning or want to keep an overview of the room temperature – all data is available at your fingertips, whenever and wherever you are.

**Independent**

The dashboard stands independent from the Top Control database. So, there is no recommissioning necessary in order to make changes to the dashboard. Just choose the datapoints you want to visualize in Priva Building Operator and group them as you like.

Priva Digital Services

Priva Customizable Dashboard is part of our Priva Digital Services Suite. For more information on our full portfolio of Digital Services and our wide range of plans, [click here](#).

Easy and quick

Easily and quickly create a complete dashboard for commissioning purposes

Save time

No need to endlessly search for your data.

Anytime, anywhere

Your data is available at all times, on any device.

Customize

Choose and adjust the datapoints, images and tables to your preferences.
