

PRIVA ALARMS FOR GROWERS

> GET AN INSTANT OVERVIEW OF THE ALARMS IN YOUR PRIVA SYSTEMS

Priva Alarms for growers

As an addition to your existing alarm systems, Priva Alarms provides you with an overview of the alarms in all Priva systems at your horticultural business. It alerts you when an alarm is activated and gives you detailed information. The app offers an instant overview of the alarms in your Priva systems while you are on the go.

> Flexibility

Your alarm information anytime, anyplace, anywhere

> Quick set up

Easy installation and multi-user application

Your business never stops, so you will need your alarm information anytime, anyplace and anywhere.

With the Priva Alarms App, you can! The app provides you an overview of the alarms in all Priva systems at your horticultural business. It alerts you when an alarm is activated and gives you detailed information. An incoming alarm? With Priva Alarms you can turn off the alarm bell remotely. You can also give an acknowledgment via the app so that your colleagues know the alarm is being taken care of.

The app was developed in close collaboration with a group of test customers. Their feedback was vital to achieve the easy set-up, the great flexibility and practical features.

Get started

With a subscription service, getting started is very easy. After your subscription, you receive your login details and are ready to go! To set up your alarms, you simply connect your locations, link your Priva systems and invite your colleagues to receive alerts.

How to get it?

The Priva Alarms app is available in the app stores of Apple and Android. With the Priva Cloud connection software, your Priva computers are connected in a safe and easy way with the Priva Cloud Service environment.
