

## PERSONAL COMFORT IN HOTELS

### > Individual climate control for each room

The perfect individual climate for your guests

### > Prevention of legionella

A warning system which pays attention to the linked showers and heating system of Priva solutions

## Comfortable stay with care for safety and environment

As a hotel owner you want an optimal occupancy rate whilst ensuring the comfort and safety of your guests. Priva solutions link every system, which makes the building management of your hotel highly organized and efficient.

Hotels are able to set desired room climate conditions on the basis of the hotel booking system. When guests arrive, climate and lights can be set to their desire. An added benefit is that you can save energy and costs that way. Rooms which are not occupied simply remain in a low-energy state.

### OUR EXPERTISES FOR HOTELS

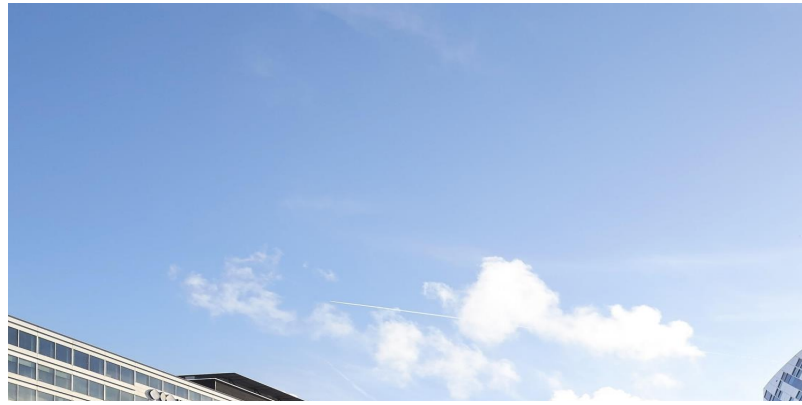

**Control the building  
climate with precision**

**Easy management of  
your building climate**

**Perfect personal  
comfort**

**Our booking system has been connected to the Priva building management system. Because of this connection, the guestrooms are always comfortable and we do not consume unnecessary energy at the same time.**

Cluster Chief Engineer Hilton Nick Lakeman

## **Prevention and safety**

Besides comfort, your guests need to be safe. That involves the prevention of legionella. By linking showers and the heating system to Priva solutions, you receive a warning when an unusual reading is detected. Also, the international Green Key hallmark guarantees a comfortable stay for your guests whilst taking care of the environment. Welcome to future technology.

## **Who's next?**

Luxury hotels such as the Sheraton Hotel in Edinburgh, the Amstel Hotel in Amsterdam, the Kurhaus in The Hague-Scheveningen, the Millennium Hotel and Premier Travel Inn in Dubai and hotel chains, such as the Accor Group, Starwood, Eden-group, CitizenM and Bastion hotels rely on Priva's intelligent control technology.
